THOMMANDRU GANESH

Senior Test Automation Engineer

Singapore, 823103 | +65 87137674, +91 9550306878 | ganeshkumar.tommandru@gmail.com | linkedin.com/in/ganesh-thommandru-0801a996

PROFESSIONAL SUMMARY

Senior Test Automation Engineer with 10 years of experience across Retail, Oil & Energy, and Banking domains. Specialises in building automation frameworks from scratch (UFT One, Playwright, UiPath) and driving AI-assisted test automation using GitHub Copilot. Delivered 50% legacy-to-modern migration with 12x execution speed improvement, enterprise tool evaluations, and CI/CD-integrated regression suites.

KEY COMPETENCIES

Automation Frameworks: Hybrid, Data Driven, Keyword Driven, POM + Data Driven
Automation Tools: UFT One, Playwright, Selenium, UiPath Studio, TOSCA
AI & Copilot: GitHub Copilot Agents, Playwright MCP, UiPath Autopilot
CI/CD & DevOps: Jenkins, Git CI/CD Pipelines, GitHub
Test Management: Micro Focus ALM, Jira, UiPath Test Manager
Languages: VB Script, TypeScript, Java, C#, SQL
Applications: Web, Desktop, SAP GUI, Mobile (Android), AS400 Terminal, Mainframe, WPF
Other Tools: Appium, Cucumber BDD, Maven, IntelliJ, VS Code, SoapUI, Digital Lab Lite

PROFESSIONAL EXPERIENCE

Senior Test Automation Engineer

July 2024 – Present

Maybank Singapore

- Built a Hybrid Automation Framework (Keyword + Data Driven) from scratch using UFT One for Internet Banking and AS400 Terminal applications, covering multiple manual test scenarios across multiple environments.
- Integrated automation execution into CI/CD pipelines via Git, enabling Jira ID-based, module-based, and full suite regression runs with automated summary reporting.
- Performed mobile automation feasibility on Android app using UFT One Digital Lab Lite across multiple device configurations.
- Conducted UiPath vs UFT One tool evaluation covering Web, Mobile, and Terminal automation — recommended UFT One for AS400 scope based on superior object-based terminal interaction.
- Completed API automation test cases and concurrent test execution across multiple applications using UiPath robots.
- Evaluated UiPath AI capabilities including Autopilot for automated test case generation, Optimize Coverage for requirements quality assessment, and AI-driven test execution invocation.
- Developed customised PDF execution reports with data comparison tables, controlled screenshots, and error highlighting for stakeholder review.
- Executed automation scripts for Regression Testing, identified defects, and reported findings with detailed evidence to business teams.
- Completed POC on GitHub Copilot + Playwright with Playwright MCP for AI-assisted test automation development.
- Evaluated and completed POC on Mobile App automation using GitHub Copilot + Appium + VS Code for cross-platform mobile testing.
- Assessed the feasibility of migrating UFT One test cases to Playwright + GitHub Copilot and successfully migrated 50% of the UFT automation project using GitHub Copilot Agents.

- Designed the migrated Playwright project using a POM (Page Object Model) + Data Driven Hybrid approach for maintainability and scalability.
- Executed and benchmarked the migrated Playwright automation suite, achieving 3.6x faster execution (sequential) and 12x faster execution (concurrent with 3 parallel workers) compared to UFT One.

Senior Automation Tester
January 2021 – June 2024

Shell Global – Oil & Energy (Accenture)

- Conducted Automation Feasibility Analysis and delivered demos on SAP GUI Desktop application automation to clients.
- Developed 250+ automation scripts utilising UFT One with a Hybrid Automation Framework covering SAP GUI workflows.
- Enhanced the existing framework by implementing a customised Word test execution report with screenshots and test steps for client-friendly understanding.
- Maintained and performed daily regression testing using Micro Focus ALM.
- Served as a Micro Focus UFT Subject Matter Expert (SME), providing guidance to other project teams.
- Supported as a Micro Focus ALM Administrator, handling user creation, role management, and defect management in alignment with Jira incidents.

Automation Test Engineer
August 2020 – December 2020

Chesapeake – Oil & Energy (Accenture)

- Implemented a Data Driven Framework and established the environment for UFT Automation scripts across Web, SAP, Mainframe, Desktop, and WPF applications.
- Conducted weekly regression suite executions, managing them through Micro Focus ALM.
- Coordinated with cross-functional teams to identify automation scope across all available business towers.
- Served as Micro Focus ALM Administrator, handling project & user creations, role assignments, and defect management.
- Conducted work estimation, task allocation, peer review of automation scripts, and provided daily status updates to the Project Manager.

Automation Tester
July 2016 – May 2020

The Home Depot (Tata Consultancy Services)

- Developed 500+ automation scripts using Micro Focus UFT for Desktop-based POS application functionality with a Hybrid Testing Framework.
- Executed Regression Testing on POS applications across 200+ stores using Jenkins CI/CD pipelines.
- Extracted store data from databases using MySQL for automation script execution and data validation.
- Developed and sustained automation scripts for e-Commerce site using Selenium with Cucumber (BDD) framework.
- Conducted training sessions on 'Integrate Jira with Micro Focus ALM' for team upskilling.
- Actively participated in release and deployment activities, ensuring smooth transitions to production environments.

EDUCATION

Bachelor of Technology – Computer Science & Engineering
Vignan University, India | 2016

CERTIFICATIONS

- Certified Micro Focus UFT One Specialist (Level 1)
- Certified Micro Focus ALM Administrator & ALM Specialist (Level 1)
- Certified Tricentis TOSCA Automation Specialist (Level 1)
